

Industrial sterilization equipment

What are the advantages of industrial sterilization equipment worth choosing?

- 1.Our industrial sterilization machinery can sterilize at low temperature and maintain the nutrition , traditional flavor of materials.
- 2.The microwave processing time is greatly shortened, with the characteristics of short time and fast speed.
- 3.Of course, our Leader company guarantees that the industrial sterilizer is directly used for food without additional heat loss, which saves energy to the greatest extent.
- 4.The equipment is flexible and easy to control.
- 5.Whether it is industrial sterilizer or other microwave dehydration equipment to ensure that the equipment is simple, do not need boiler, complex pipeline system, as long as the basic conditions of water, electricity can be.
- 6.Improving working conditions and saving land.

Product specification:

Condition	New	Authentication	CE
Automatic level	Self-motion	Guarantee	1 year
Production capacity	500 kilogram/hour	After-sales service	Field installation, debugging and training
Head stream	Chinese Mainland	Product name	Industrial sterilization equipment
Brand	LD	Control system	PLC
Model	LD - 60KWV	Head stream	Jinan - Shandong - China
voltage	220V ~ 380V	Capacity	600 ~ 750 kilogram/ h
Power (W)	60KW	Color	argentate
Size (L*W*H)	12860 * 1060 *1750 millimeter	Function	Sterilization
Weight	2T	After-sales service	Field installation, commissioning and tracking

Our Leader Microwave Equipment, one of the professional Microwave Equipment manufacturers, can supply different power models just to suit your requirements. These microwave industrial sterilization equipment is of high quality and the price is favorable. If you are interested in our machine, please leave us a message.

			
10kw Microwave sterilization equipment	20kw Microwave sterilization equipment	30kw Microwave sterilization equipment	Higher power can be customized

Traditional heat sterilization was mainly carried out by heating, with the characteristics of slow heat transfer and long sterilization time, which seriously affects the quality of agricultural products such as color, texture and flavor. Microwave sterilization is a new type of sterilization technology, with strong penetration, short heating time, uniform heating.

Representative fungi, viruses, and aerobic and anaerobic bacteria, including spore formers, can easily be killed in a conventional microwave oven with proper modifications. Metal instruments, including air turbine handpieces and burs, and acrylic dentures can be sterilized in short periods.

Why chose Industrial microwave Equipment?

Our equipment is of good quality, convenient to use, green and environment-friendly, and our after-sales service is thoughtful and considerate. Over the years, our equipment has been exported to many parts of the world, and many loyal customers will inspect and order for you.

Before the purchase,we will provide consulting services for free. When you buy our products, we will be free for you to debug and install. After the purchase,we will still be timely for you to answer questions, if necessary, on-site maintenance and testing will be provided.The tradition of regular return visits has also been well received.If you want to buy our industrial sterilizer or microwave dewatering equipment, please contact us.
